

CARLOS SAUCEDO

(561) 320-3150 | carlos.gabriel.saucedo@gmail.com | github.com/LeoSaucedo

SKILLS

Languages: Java, Python, JavaScript/TypeScript, Bash, SQL

Backend & AI: Spring Boot, Flask, REST APIs, Apache Kafka, MCP, SDD (Spec-Driven Development), Agent Workflow Design

Cloud & Infra: GCP, AWS, Firebase, Kubernetes, Docker

Data: PostgreSQL, SQLite, MySQL, Couchbase

Testing & CI/CD: JUnit, Cucumber, Pytest, JMeter, GitHub Actions, Jenkins, Spinnaker, Agile/Scrum

Observability: Kibana, Grafana

EXPERIENCE

Software Engineer II

May 2021 - Present

Lowe's Companies, Inc. — *Charlotte, NC*

- Architected Spring Boot microservices and REST APIs powering MyLowe's Rewards (2024) and MyLowe's Pro Rewards — MLPR (Feb 2025), processing 34M+ transactions/year and awarding \$100M+ in Pro rewards across 35M+ loyalty members
- Built HomeCare+ (HC+) backend from the ground up — a \$99/year associate-powered home maintenance subscription — delivered through nationwide launch (Mar 2026)
- Engineered the MLPR American Express card integration (Apr 2026), including multi-tier points logic (Gold/Platinum/Titanium), redemption flows, and Synchrony issuer migration serving 70M+ onboarded accounts
- Integrated loyalty partnership campaigns — McDonald's Monopoly (Fall 2025), Circle K rewards, and the "Epically More Messi" World Cup campaign (May 2026) — driving member acquisition, engagement, and cross-brand reward fulfillment
- Pioneered SDD (Spec-Driven Development) using Spec Kit to deliver MCP-based AI agent tooling, wrapping internal platform services as LLM-accessible tools; built SRE triage automation resolving 95% of tickets autonomously and eliminating a ~250-ticket backlog in one week
- Owned CI/CD (GitHub Actions, Kubernetes, Jenkins, Spinnaker) on GCP ensuring zero-downtime deploys; authored Cucumber/JUnit test suites with JMeter load profiles for high-throughput Kafka-backed services

Software Engineer

Sep 2019 - Jan 2022

Grainhouse LLC — *Tallahassee, FL*

- Co-founded Hire Wells, an intelligent sourcing chatbot for Slack and Teams; architected end-to-end on Python, AWS, and Slack/Teams/Intercom APIs

PROJECTS

Octobot — Open-Source Group Expense Tracker Sep 2022 - Present

Co-creator & tech lead (4 developers) | React/Ionic + Python/Flask + SQLite

CI/CD via GitHub Actions to Firebase on merge | github.com/LeoSaucedo/octobot

OpenClaw Agent Ecosystem — Personal Project 2025 - Present

Designed and deployed 10+ autonomous AI agent skills — trading automation, email triage, calendar orchestration, e-commerce workflows — using SDD, MCP tooling, and an open-source agent orchestration framework

EDUCATION

BS Computer Science, Florida State University

Dec 2021

Concentration in Mathematics
